## Experience

18 October 2021 – 6 March 2024

### PT Smart Telecom

- **AMS:** Create web-based monitoring applications using HTML, CSS, PHP, Javascript and the MYSQL database.
- **CAMS:** Create web-based ticket incident application using HTML, CSS, PHP, Javascript and a MYSQL database.
- **Ultimate-tools:** Creating a web-based in-house application for users to see the data they need without repeated querying, this application is made with Node JS, Express JS and React JS using MYSQL and PostgreSQL databases with backend and frontend concepts.
- **ITSM-Dashboard:** Creating an in-house web-based application used by the supervisor for the purpose of calculating the success rate on another application, this application is made with Node JS, Express JS and React JS using the MYSQL database with the concept of backend and frontend.

1 February 2019 - 16 October 2021

### The Clinic Beutilosophy

- Create and design web-based applications for managerial purposes, such as: knowing each branch's turnover, knowing the sales and revenues of each branch, creating a net and dirty profit chart, etc. This application is made using HTML, CSS, PHP and Javascript with MYSQL as its database.
- Create and design website-based applications for billing purposes in related branches from starting registration of participants to making invoices that can be sent via WhatsApp or email.
- Create an automatic stock opname feature if there is a product that comes out through a transaction then the stock will decrease automatically, as with the purchase of the product then the stocks will increase automatically.
- Create new features that are needed as needed.
- Train the user to use this application.

## Education

July 2015 - February 2019

### STMIK Jayakarta

#### S1 Computer Engineering

Research: Design and build application information system tracer study at STIE & STMIK Jayakarta.

## Programming Skills

#### Frameworks / Library

- React JS
- Laravel
- Express JS

#### Native

- HTML, CSS, PHP and Javascript
- Node JS

#### Database

- MYSQL
- PostgreSQL
